

Thematic Topics workshops

- complementary partner -

Name of the Project: **FORCLIMADAPT**

Name of the Partner: **CTFC**

Name of the speaker: **Eduard Plana (Míriam Piqué and Lluís Coll team)**

Challenges and opportunities on each cross-sectoral component

Cross-sectoral components: C1. Governance and participation involvement; C2. Operational and R+D priorities; C3. Target group focused communication needs; C4. Financial needs and opportunities

From your MED project expertise, describe shortly main conclusions for:

Topic 1: Integrated management of natural protected areas

Topic 2: Natural risks management, especially wildfires

(add more slides if necessary)

Climate change scenarios are affecting the survival of natural heritage – the stress of public commitment in the conservation of the “photo finish” (how to deal with uncertainty?) C1 + C4

CC mitigation strategies usually need active management actions = The powerful role of pedagogy for coming from PA C2 +C3

CC mitigation strategies usually need active mixed species / forest / ecosystems = The PA as a reservation C3

PA as an “introduction” for general public to nature = offering the history of human-made landscape C2
