

Thematic Topics workshops

- complementary partner -

Name of the Project: Proforbiomed

Name of the Partner: CRPF PACA

Name of the speaker: Louis-Michel DUHEN and Nicolas JOLY

Challenges and opportunities on each cross-sectoral component

Cross-sectoral components: C1. Governance and participation involvement; C2. Operational and R+D priorities; C3. Target group focused communication needs; C4. Financial needs and opportunities

From your MED project expertise, describe shortly main conclusions for:

Topic 1: Integrated management of natural protected areas

Topic 2: Natural risks management, especially wildfires

(add more slides if necessary)

The management of natural protected areas must take into account the forest management and not impede it (example of urbanism documents)

Taking into account the protected areas (i.e natura 2000) in the forest management plans.

Operational tools and best practices [Linked with the e.Book contents](#)

Cross-sectoral components: C1. Governance and participation involvement; C2. Operational and R+D priorities; C3. Target group focused communication needs; C4. Financial needs and opportunities

From your MED project outputs, mention shortly some operational tools or best practices/ experiences that could be linked with the corresponding topic (classify them by component if is possible):

Topic 1: Integrated management of natural protected areas

Topic 2: Natural risks management, especially wildfires

(add more slides if necessary)

Tool to implement forest management plans taking into account all the protected sites and environmental legislation.

Guidelines on the impact of biomass aimed management of forest on biodiversity and environment.

Law compilation on forest management in each proforbiomed partner's country (including management in protected areas).

Methodological recommendations [Linked with the e.Book contents](#)

Cross-sectoral components: C1. Governance and participation involvement; C2. Operational and R+D priorities; C3. Target group focused communication needs; C4. Financial needs and opportunities

From your MED project expertise, mention shortly some methodological recommendations for improving / enhancing a project proposition / development / transferring that could be linked with the corresponding topic (classify them by component if is possible):

Topic 1: Integrated management of natural protected areas

Topic 2: Natural risks management, especially wildfires

(add more slides if necessary)

Better take into account of the private forest owners in the management of such areas

Not impede forest management or human activities in these areas
